ICE BLAZER ALPINE

CERTIFIED FOR WINTER SAFETY AND PERFORMANCE

The Sailun Ice Blazer Alpine is the latest generation of studless HP Alpine winter tyre for cars and family sedans in Europe. The pattern is focused on winter driving safety by providing optimum stability and control on snow, wet and dry roads.

Winter Performance

100% silica compound maximizes tyre grip, reduces rolling resistance and wear, while also maintaining flexibility in cold temperatures. The variable pitch reduces noise emissions and enhances anti-vibration to promote uniform tread wear. Overall steering response and driving comfort has been optimized to perform in wintery conditions.

TYRE PERFORMANCE AND QUALITY TESTED AND CERTIFIED BY TÜV SÜD PRODUCT SERVICE

What is the TÜV Tyre Test Mark?

TÜV Tyre Test mark is a **mark of excellence** that certifies a tyre compares favorably with competitor products in terms of quality and performance.

TÜV Tyre Test mark is also a **mark of confidence** that assures consumers they are making a safe choice when buying the most critical "after-sales product" for their car.

M+S

Winter Safety

Alpine's variable pitch design, increased lateral grooves and sipes provide excellent traction and braking performance on snow, wet and even dry roads while improving aquaplaning resistance.

The directional pattern efficiently funnels fluids and allows for greater road contact that functions perfectly in various wintry conditions.

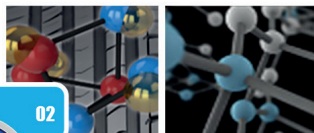

The Design Technologies

The Directional Pattern
Developed in Europe
